Partial Dentures

Techniques

The Lab Technicians recommended in this list are well prepared to deliver quality results from the techniques that Dr. Massad teaches.

Modified Massad Metal Base Technique

This technique uses tissue stops on the retromolar pads and anterior mandible. This is the most popular and represents Dr. Massad's most recent improvements. Remember to ask for acrylic baseplate.

Standard Massad Technique

This technique has the retromolar pad in metal and anterior stop on tissue side. Ask for acrylic baseplate.

Shipmon Technique

This technique has all metal on tissue.

Casting
